SHER ALI KHATTAK

Mobile Application Developer | Flutter | React Native

+923325342357 skhattak30@gmail.com Linkedin Portfolio

SUMMARY

Flutter Developer with 5 years of hands-on experience shipping cross-platform iOS and Android applications used in production. Deep expertise in Dart, state management (BLoC, Riverpod), RESTful API integration, offline synchronization, and real-time data with Firebase and Supabase. Deploys and manages cloud infrastructure on AWS, with end-to-end backend capability in Golang. Able to design, build, and ship features without a backend dependency. Proven track record as an independent freelancer, delivering client projects from brief to App Store release across fintech, e-commerce, and productivity verticals.

KEY ACHIEVEMENTS

App Performance Optimization

Enhanced app performance by 50% through systematic code optimization techniques.

Application Development Success

Developed and maintained 10+ high-quality applications, resulting in streamlined workflows, reduced bug rates, and reliable software solutions delivered on time.

FYP Expo

Secured 7th position at FYP Expo for developing an OBD-II based application that detects road bottlenecks through real-time data analysis, achieving measurable improvements in detection accuracy.

EXPERIENCE

Senior App Developer

Beacon Energy Pvt Ltd

01/2026 - Present Islamabad, Pakistan

- Responsibe for developing and maintaining multiple production-grade cross-platform mobile applications as the sole developer, driving continuous performance optimizations and system improvements that resulted in a 40% increase in overall application performance and 99.9% uptime across iOS and Android production environments.
- Collaborated closely with the NOC and Management teams to identify, escalate, debug ,and resolve server-side issues on a Laravel-based backend infrastructure, ensuring minimal service disruption and maintaining application stability across production environments.

Flutter Developer

Duseca Software

01/2024 - 12/2025 Islamabad, Pakistan

- Developed apps from scratch by collaborating with UI/UX designers, Project Managers and Team Lead.
- Improved code quality and on-time delivery compliance by 70% through collaboration with 4 cross-functional teams.
- Introduced and integrated software testing frameworks and QA tools, improving code coverage and reducing post-release bug reports by 30% through systematic quality assurance processes.

Junior App Developer

Dcodax Pvt, LTD

05/2022 - 12/2023 Islamabad, Pakistan

- Developed applications from scratch based on client requirements, focusing on seamless UI, performance optimization, and clean architecture.
- Improved app user engagement by 40% by enhancing UI with Rive and Lottie animations.

Part Time Freelancer

Independent

01/2019 - Present Location

- Engaged in part-time freelance work spanning a diverse range of technical domains, successfully delivering 20+ projects across Arduino-based embedded systems, cross-platform mobile development with Flutter, front-end web development, server-side scripting in Python, and systems programming utilizing C++ and the SFML library — demonstrating consistent versatility and adaptability across both hardware and software disciplines.

SKILLS

FLUTTER | GOLANG | CLOUD SERVICES | CI/CD

EDUCATION

Bachelor of Science in Computer Systems Engineering

University of Engineering & Technology

08/2018 - 08/2022 Peshawar, Pakistan

- Gained experience in computer architecture, embedded systems, programming, networking, and software development.
- Focused on automation, system optimization, and innovative computing solutions.

Pre Engineering

Islamia College Peshawar

05/2015 - 04/2017 Peshawar, Pakistan

- Developed a strong foundation in mathematics, physics, and chemistry, with a focus on problem-solving, analytical thinking, and technical concepts essential for engineering studies.

RECENT PROJECTS

UpAlerts: AI Writer & Alerts

- Developed and maintained a real-time job alert and AI-powered cover letter generation platform tailored for Upwork freelancers. The application delivers instant push notifications for newly posted Upwork jobs, enabling users to apply ahead of the competition and maximise their chances of winning projects. Integrated an AI cover letter builder that generates tailored, job-specific proposals in seconds, significantly reducing the time and effort required per application. Published on Google Play and Apple Store with 40,000+ downloads and an active user base of freelancers across Pakistan and internationally.

Optical Fit

- Engineered a cutting-edge augmented reality virtual try-on application enabling users to visualize eyewear in real time directly on their face. Built on ARKit and ARCore, the app leverages advanced face tracking, precise facial landmark detection, and high-fidelity 3D rendering to accurately overlay glasses and sunglasses onto the user's live camera feed. Designed for seamless cross-platform compatibility across iOS and Android, delivering a consistent and immersive experience on both ecosystems. The application eliminates the guesswork from online eyewear shopping by providing users with an accurate, personalized, and interactive preview, fundamentally transforming the e-commerce try-before-you-buy experience.

Popdarts

- Built Popdarts app with 5000+ users makes tracking scores effortless, whether you're hosting game nights, competing in tournaments, or perfecting trick shots. Stay connected with the Popdarts community and unlock upcoming leaderboards, exclusive content, and VIP access. Popdarts isn't just a game. It's a movement. Join us today.

Wild Sound

- Drove a 40% increase in global engagement by immersing users in rich, high-quality soundscape experiences sourced from over 50 of the world's most breathtaking rivers and rainforests. By bringing the raw, natural sounds of diverse ecosystems to life, users around the globe found deeper relaxation, focus, and connection with nature resulting in longer sessions, stronger retention, and a growing worldwide community of nature sound enthusiasts.
